DANIEL VICTOR BERNARD

Frontend Developer | React Developer | Full-Stack Development in Progress

+234 706 655 7974 | github.com/skidan007 | my-portfolio1-sigma-five.vercel.app | linkedin.com/in/daniel-benard-199313386

PROFESSIONAL SUMMARY

Frontend Developer with hands-on project experience building responsive web interfaces and mobile-app screens using React, JavaScript, TypeScript, Tailwind CSS, and Expo. Familiar with component-based UI architecture, REST API workflows, Git/GitHub, and connecting applications to backend services. Currently expanding into backend development with Node.js, Express, and PostgreSQL through StockFlow, an inventory and bookkeeping application. Focused on writing maintainable code, solving practical product problems, and continuously improving through project-based learning.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React, React Native, TypeScript, Tailwind CSS, Vite, responsive design

Backend & data: Node.js, Express.js, PostgreSQL, REST API concepts, Supabase, SQL fundamentals

Tools & workflow: Git, GitHub, VS Code, Expo, Expo Router, npm, environment-variable configuration

UI & engineering: Reusable components, mobile-first layouts, form and navigation flows, accessibility awareness, debugging, performance-conscious UI

DEVELOPMENT EXPERIENCE

Independent Software Development Projects | *2023–Present*

- Build and refine web and mobile application interfaces using React, JavaScript/TypeScript, Tailwind CSS, and Expo.
- Create reusable components and responsive layouts with attention to usability, consistent styling, and maintainable structure.
- Use Git and GitHub to manage source code and document project progress.
- Practice application integration patterns, environment configuration, database-backed workflows, and troubleshooting through hands-on projects.

SELECTED PROJECTS

StockFlow — Inventory & Bookkeeping Application | *Node.js, Express.js, PostgreSQL*

Developing a backend for tracking stock quantities, pack/carton units, purchase costs, sales, and remaining inventory. Working through database configuration, schema design, migrations, indexes, and Express API structure as a guided full-stack learning project.

Verified Africa — Social & Dating App UI | *React Native, Expo, TypeScript, Expo Router, Supabase*

Implemented a multi-screen mobile UI for an 18+ social and dating concept with onboarding, identity-verification steps, profiles, discovery, chat, rooms, wallet, and safety flows. Set up a centralized Supabase client and foundational database migration with row-level security policies; authentication and production identity verification are not claimed as complete.

Responsive Portfolio Website | *React, Tailwind CSS, Vite*

Built a responsive portfolio website with reusable components and mobile-first layouts to present development work.

BudgetFlow — Personal Finance App Concept | *React, Vite, Tailwind CSS, Supabase*

Worked on a personal-finance application concept covering transactions, budgets, and currency-related workflows.

EDUCATION

University of Lagos — Business Administration (in progress)

CERTIFICATIONS

- Frontend Development Certification — ALX Africa (2025)
- Programming Foundations: JavaScript, HTML and CSS (2023)
- Professional Foundations (2024)
- AI Career Essentials (2024)
- Introduction to Git and GitHub (2026)

PROFESSIONAL STRENGTHS

Problem-solving • Communication • Collaboration • Adaptability • Product thinking • Continuous learning
